Profile Summary

B.Tech Computer Science and Engineering (IoT) student at Shiv Nadar University, Chennai, with hands-on experience in full-stack development, backend services, and real-time web applications. Skilled in using modern frameworks such as React.js, Node.js, and Express.js. Passionate about solving complex problems through code and continuously improving user experiences and integrating AI into modern development workflows. .

Education

Shiv Nadar University, Chennai

B.Tech in Computer Science and Engineering (Internet of Things)

Chennai, Tamil Nadu

Aug. 2023 – May 2027

Experience

Infosys Springboard

Remote

Full-Stack Intern

Aug 2025 – Oct 2025

- Developed **15+ dynamic UI components** using **Angular**, improving application interactivity and frontend responsiveness across multiple modules.
- Collaborated with a **7-member cross-functional team** to implement and refine frontend features, enhancing usability and development efficiency.
- Worked extensively with **Angular components, services, routing, and data binding** while contributing to **real-world application modules**.

McCarthy - AI Market Place

Remote

Backend Intern

May 2025 – July 2025

- Developed and deployed **multiple backend microservices**, building scalable and maintainable server-side architectures for application workflows.
- Optimized **10+ API routes**, improving backend response time by **30%** and reducing service downtime during testing.
- Collaborated with fellow interns to test, monitor, and maintain deployed services, contributing to stable backend performance across multiple deployments.

Projects

ResumeSync: AI-Powered Resume Enhancer | *React.js, Node.js, Express.js, Groq API* | 

- Built an AI-powered resume enhancement platform using **Groq API**, capable of analyzing and optimizing **100+ resume entries** with intelligent text enhancement workflows.
- Implemented **5+ AI-driven features** including resume rewriting, skill enhancement, and ATS-friendly content generation to improve resume quality and readability.
- Designed a responsive and user-friendly interface enabling users to generate professional resume content in **under 3 seconds** through AI-assisted workflows.

Inaikka: Real-Time Full-Stack Chat Application | *MongoDB, Express.js, React.js, Node.js, Socket.IO* | 

- Developed a real-time full-stack chat application** using the **MERN stack** with **Socket.IO**, supporting low-latency messaging for **50+ concurrent users**.
- Implemented **6+ core features** including secure JWT-based authentication, searchable user lists, real-time text and image messaging, and online/offline presence tracking.
- Designed a **responsive multi-column UI** with optimized chat rendering and scalable architecture, reducing message update delays to **sub-second latency**.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript

Frontend: React.js, Tailwind CSS, HTML5, CSS3, ShadCN UI

Backend & Databases: Node.js, Express.js, REST APIs, Socket.IO, MongoDB, MySQL

AI Technologies: LangChain, LLM APIs, AI Workflow Automation, n8n, Prompt Engineering

Developer Tools & Platforms: Git, GitHub, VS Code, Postman, Figma, Google Stitch AI

Certifications

Model Context Protocol: Advanced Topics – Anthropic Courses

Complete Full-Stack Web Development Bootcamp – Udemy

Achievements

10x Hackathon Finalist for developing innovative solutions across AI-powered web applications, civic-tech platforms, and real-time systems.

GDG GITAM Vizag Track Winner for building **Ytheys**, a startup discovery platform connecting startups, innovators, and industries through a scalable modern web interface.
